Kamco Invest Saudi appoints Ibrahim Al-Shariadah as CEO

Ibrahim Al-Shariadah

Sufyan Zamil Al-Zamil

RIYADH: Kamco Invest, a regional non-banking financial powerhouse, with one of the largest AUMs in the region, announced the appointment of Ibrahim Al-Shariadah as Chief Executive Officer for its operation in Saudi Arabia.

Al-Shariadah joins Kamco Invest - Saudi with extensive experience in banking and Investment having held several executive positions with top Asset Management firms in the Kingdom of Saudi Arabia. He has experience across all core areas of Asset and Wealth Management, managing various investment asset classes and building strong relations where he has served government and semi-government institutions, regional sovereign wealth funds, Saudi and regional family offices, and UHNW individuals. He holds a BA in Management Information and an MBA from Colorado Technical University (CU, CTU), USA.

Prior to joining Kamco Invest - Saudi, Al-Shariadah headed the Wealth Management at Al-Rajhi Capital, leading a team of 40 people with an AUM in excess of SAR46bn in a multi-asset class portfolio. He has also held several executive positions with exposure across regional and international markets including Head of Discretionary Portfolio Management (DPMs) at Al-Rajhi Capital, Acting Head of Capital & Money Market and Senior Fund Manager at Adeem Capital in Saudi Arabia, as well as several positions at Samba Capital in Saudi Arabia where he first started his career, the last being Senior Fund & Portfolio Manager in the Equity, Money Market and Real Estate Funds Department under the Asset Management Division.

Engineer Sufyan Zamil Al-Zamil, Chairman of Kamco Invest - Saudi, said, "We are pleased to welcome aboard Ibrahim Al-Shariadah as Chief Executive Officer of Kamco Invest - Saudi. His experience and track record will be an added value to lead the Saudi operation to further contribute towards the implementation of the group's growth strategy."

Commenting on his appointment, Al-Shariadah said, "Kamco Invest has built a strong reputation in the local and regional markets as a leading non-banking financial services provider and as one of the largest asset managers in the GCC. I look forward to working with the talented team in Saudi Arabia as we work together to progressively strengthen our position in the Saudi market, capitalizing on the vast resources that Kamco Invest has to offer as well as the strength of its regional reach."

It is worth noting that Kamco Invest manages an AUM of around \$12.9 billion (as of 31 December 2020) on behalf of its clients in various asset classes and jurisdictions, making it the fifth largest asset manager in the GCC according to Moody's asset management report dated September 2019. It also holds a strong track record with investment banking credentials exceeding \$23.8 billion since inception till 31 December 2020 in equity capital markets, debt capital markets and mergers & acquisitions. Kamco Invest - Saudi manages the Kamco Saudi Equity Fund with AUM in excess of SAR 685 million (as of 7 February 2021), making it the second largest conventional Saudi equity fund, and the largest fund managed by an independent investment company not affiliated with a local bank.

KFH opens 10th KFH-GO at Kuwait International Airport

Members of the executive management of KFH and DGCA officials

KFH-GO-Airport branch

KUWAIT: Kuwait Finance House (KFH) inaugurated the tenth 24/7 digital self-banking station in the arrivals hall on the ground floor at Kuwait International Airport. The inauguration took place in the presence of members of the executive management of KFH and officials of the Directorate General of Civil Aviation.

The new e-branch KFH-GO comes within an ambitious plan developed by KFH under the theme "easy banking experience" for opening more e-branches in different locations in Kuwait. This confirms KFH's achievements in providing diversified e-banking services and its continuous pursuit of becoming a FinTech pioneer as part of its digital transformation strategy.

KFH-GO offers customers highly efficient e-services covering over 80 percent of the services and transactions provided by traditional branches, making it the preferred choice for many segments of customers, especially young people.

Interactive services

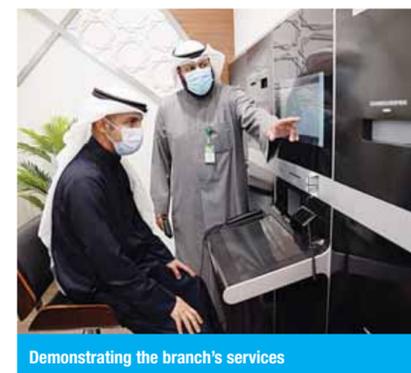

KFH-GO-Airport branch contains an XTM

machine which enables communicating directly with the telephone service personnel in audio and video calls, and 5 ATMs as well as a cash deposit machine (Bulk Deposit) capable of accepting 300 notes in a single transaction.

Customers can access several services, including conducting "Murabaha" financing transactions, requesting credit cards and prepaid cards, updating data and phone numbers, activating bank cards, opening deposits and accounts, receiving gold bullion (10 grams), opening (Gold, Saving, Alrabeh, Electron) accounts, buy and sell gold, cash withdrawals without a card through the mobile phone using the "QR code", IDs or phone number, as well as a host of banking and financing services in a secure and fast manner.

Two branches at Airport

KFH has recently inaugurated its fully revamped branch in the departures lounge (first floor) of Kuwait International Airport. It stands out for its spaciousness, contemporary design, and modern technology.

Demonstrating the branch's services

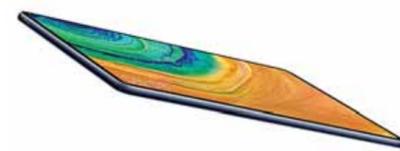

This reflects KFH success in boosting its Airport presence to offer best banking services around the clock.

How the industrial change happened with Huawei

KUWAIT: With the last year emphasizing the need for working from home and e-learning scenarios, the demand for tablets and laptops has seen a huge surge. Every household now requires at least one laptop per person, be it for work or studies, which can be further complemented by a tablet and a smartphone to integrate them all together.

Along with an increase in demand for laptops, there has also been an increase for tablets. However, with both devices together, the user experience is further enhanced by having them connected under one ecosystem. This is where the smartphone comes in as a central device to control both and acting as a source for seamless integration. This industrial change happened strongly with Huawei, whose smart products and cloud services are all integrated and inter-connected under its 1+8+n strategy as part of the Huawei AI Seamless Life to provide users with an immersive and connected experience. This strategy essentially keeps the smartphone at the center of it all, such as the Huawei Mate 40 Pro, to connect to 8 different categories of Huawei products and wide range of IoT devices (n) through layers such as Huawei Share and HiLink (+).

Coming back to laptops and tablets, Huawei enhances the user experience by integrating them with a smartphone for a providing seamless interactions and smart solutions. For example, working, replying to chats and even answering emails are most easily done on a smartphone, but constantly picking up a smartphone while working can be quite disruptive for productivity. Solving this is the Multi-screen collaboration feature from Huawei. Users can simply take their Huawei smartphone and tap it on a compatible Huawei laptop like the Huawei MateBook X, to instantly stream the smart-

phone display on the laptop. This way, users can control both devices at once, open multiple windows to run more apps from the smartphone simultaneously and even drag and drop files for easy file transfer. Users can also answer calls received on the smartphone directly on the laptop instead, even using the connected peripherals. Another advantage is how content from the smartphone can be enjoyed on the larger laptop display.

A similar relationship is also built between Huawei's smartphones and tablets like the Huawei MatePad Pro, with multi-screen collaboration at the user's disposal. This also comes in use with regards to education, where it's easier to have multiple apps open side by side, be it for attending class and references, for a more immersive studying experience. Additionally, Huawei's devices and services are connected under one universal Huawei ID. In addition users can be enjoying music or videos on services like Huawei Music or Huawei Video, and can seamlessly switch between the smartphone and tablet without any kind of interruption.

Having a combination of smart devices from Huawei rearing to go not only creates a smarter and technological space at home or office, but also assures enhanced productivity and an immersive experience, be it for work or studies, thus driving a change in the industry towards a more advanced and connected digital future. Meta description: Laptops, tablets and smartphones have become common in every household. This is how Huawei brings all of them together for a more connected experience.
