73. A platform raised above the surrounding level to give prominence to the person on it.
75. Call upon in supplication.
76. A unit of length of thread or yarn.

STAR TRACK

Aries (March 21-April 19)

Unexpected changes can disrupt the usual order and routine of your life. You may want more creative expression in your work, but those in control tend to be unsympathetic. In time you will be able to set examples on how to improve business, particularly when your co-workers follow your example. Your common sense is called for this afternoon when someone wants to involve you in a fantastic deal! Considering you may have a young person that could learn from your insights-you find a clever way to disclose the real truth of what really sounds like a fantastic deal. Loved ones that surround you this evening gain from your presence. You are amused tonight. A movie, a friend or some event that takes place finds you full of chuckles and smiles.

Taurus (April 20-May 20)

This may just be mid-week but you will probably want to begin your plans for a fun gathering this weekend. Your workday can be slow from time to time and this may be one of those days. It may occur to you that there are ways to update or improve the quantity of incoming work and this afternoon you will pick up a few extra clients. You seem to have a magic tongue and your enthusiasm in your communication about your work can be contagious. This afternoon you could gain insight from young people. Just being with all that energy is electrifying. Guiding, advising as well as just having a plain old good time is in order now. A sports activity out-of-doors can be enjoyed as things cool down later today and may even involve some play in water.

Gemini (May 21-June 20)

Some sort of temporary obstacle may appear this day but if you can look beyond the situation you will get past the problem quickly. You will find the afternoon full of opportunities to be creative. Expressing yourself with a flair comes to mean a lot to you. Adding your name to an invention is quite a mark of accomplishment. A get-together with friends can prove rewarding this evening. You work with real imagination and understanding in areas of the mind that are the most personal or private: in-depth psychology. You are like a midwife of the spirit, assisting at the birth of each individual going through a spiritual or rebirth process. You accept the natural process of birth, spiritual and physical, and have dedicated yourself to helping it along from time to time.

Cancer (June 21-July 22)

It's a sleep late, catch up on chores and a goof off type of day. A co-worker may want your help today but unless help is really needed, you may find yourself moving away from any stressful activity for now. If you do decide you will help this person, you will be working with him or her for most of the day. It is important to take a little time to refurbish your energies. Later today, you will have an opportunity to have a special time with someone you love. You have new insight into home, possessions and the whole domestic scene. Financial independence gains your attention and future plans are in the making. You discover freedom in steady, predictable growth-like a growing plant. There are good feelings and harmony.

Leo (July 23-August 22)

You seem quite happy to be with others in an atmosphere of teamwork. You may be chosen to lead the group in some project that will help speed work along at a more acceptable speed. Others accept you-they sense you are a leader and admire your regal manner. All parts of your life are touched by your sense of originality and spontaneity. Everything hangs on the innovative approach to things and people that mark your style. Questions of independence are absolutely essential to your way of life-you are quick to revolt when anything is distracting. Relaxing this afternoon after work may mean you take time to shower and change clothes. Activities with young people, neighbors or friends add to those feelings of wellbeing today.

Virgo (August 23-September 22)

You can be dramatic and exhibit warmth to all who meet you and today is one of those days. You are gregarious, outspoken and independent. There are plenty of opportunities to use your communication skills this morning. You communicate with great skill and it is stimulating to be with you. When you are feeling emotional, you use that feeling as a key to look for truths. This is how you help others. This afternoon is a time for relationships, studies, hobbies, travel and communications. There is a human resource potential in all you meet and you just naturally move to encourage the enthusiasm for inventions, discoveries and all sorts of creative expression. Today you enjoy the old and the new. Relax, enjoy this special time.

Libra (September 23-October 22)

This is a time to take risks and dare to be a little unconventional. You will prosper through new insights, inventions and an independent point of view. Your professional life gains notice through your achievements. This in turn pulls in business that may surprise you. Learning and knowing a little about a lot of things, staying in touch and on top of the latest developments satisfy a need for mental stimulation. This afternoon would be a good time to take in a good movie. Ideas and thoughts will be gained because of the company you keep or something that will be discussed. That creative project you have been working on at home will get a big boost tonight-take notes. Sharpening these creative skills of yours may also help your psychic insights.

Scorpio (October 23-November 21)

You are very sensitive to the slightest emotional change today. You have all the talent needed to teach most any subject and there may be a bit of psychology today. Putting effort into a small amount of time will bring you some great results. Writing, music and cooking are just some of the areas in which you excel. Writing poetry, computer software, games, robotics, are also enjoyed. A sense of support makes this a good day. It seems the most important class you could teach now would be cognitive reading. All indications show that if there were all-year schools the classroom would still be full of young people hanging on your every word. This afternoon you might consider some physical pursuits. Friends may want to take you bowling or skating.

Sagittarius (November 22-December 21)

This is a good day to solve problems and make important decisions-at work or at home. You find your way around almost any obstacle and are in control and able to guide yourself with ease. Your sense of inner direction is good and should lead to opportunities. Quantum physics, anti-gravity and many other expanded thinking or scientific news items become subjects of involvement for you. You look forward to the next new invention. You may encourage others to think outside the realm of what they think is possible and dream about what could be. Here is an opportunity to get some insight into some future educational and professional possibilities. Life is an exciting adventure but it is good that your sharp mind remains aware of political trends.

Capricorn (December 22-January 19)

A lighter workload of late leaves you with a better forecast this weekend. You actually have the time to plan some last-of-the-summer party for the weekend. After the noon break there may be some demand on your time to speed through a customer's request. This could be a mistake so stop and double-check your work before you sign off on the job and you will be glad of the outcome. This evening is a time of surprises-good ones. Party plans for the weekend are approached once more and go without a problem. There is a good response to your request for help-add more volunteer helpers anyway. Possessing good common sense, you are very down-to-earth-nurturing and protective to all. Others appreciate you more than you realize.

Aquarius (January 20- February 18)

There could be levels of existence as well as technology that are far beyond our current status here on this earth. You and a co-worker may be working on some new project today. Enjoying some current-day invention you may remember a past science fiction story or movie that used the same invention. You have a knack for always finding assistance in your interests. You have ideas of your own and they fit quite nicely on paper inside a hard cover called a book! You may want to write a science fiction book or just record your thoughts on some new technology. Handicapped people need new technology and this is an area about which you may want to write; there is success. You will find good results on the work you do at this time.

Pisces (February 19-March 20)

Your community spirit may come into play today. There is a drive to work with others on projects that concern humanitarian interest. Your work may involve charity organizations and with your professional comrades you are able to help build up an organization that does grand things for others. This may be health drives or equipment for the handicapped or animal rescue care, etc. There is an urge to find a way to make your dreams a reality and this, as well as your work, keeps you moving in a forward direction. There is a feeling of being a part of the bigger picture-you are very communicative, not just a little curious-conversations come easily. Study, research and investigations of all kinds may come into play at this time.
