NBK. Number one in London.

Kuwait's leading bank opens its first branch in London

A London branch of the National Bank of Kuwait, Kuwait's leading national and international commercial bank, opens today. The new branch is licensed to take deposits, and offers personal banking facilities plus a wide range of international services: syndicated loans, corporate finance, foreign exchange, Eurocurrency deposits, trade finance including documentary credits and guarantee facilities.

These are in addition to the investment and real estate management services available from NBK Overseas (London) Ltd at the same address. NBK is especially pleased to add a London branch to its growing overseas presence which now includes a representative office in Singapore, and a worldwide network of over 750 correspondent banks.

Another branch in the West End of London (Orchard Street) is also scheduled to open soon to offer a full range of banking services to our customers from Kuwait visiting London.

To find out how we can help your overseas operations and development, contact:
